ABOUT THE COURSES

“Commercial Vehicle Accident Investigation, Enforcement and Airbags/Black Boxes”

rollover

A commercial motor vehicle accident can occur in seconds. Scattered amidst the wreckage and debris are the key elements as to how and why the accident took place. The physical evidence, witness statements and vehicle damage can be difficult to interpret. Commercial vehicle accidents are often the most violent and complex. They are amongst the most difficult accidents to investigate. Commercial vehicles have been increasing in their sophistication in recent years, including anti-lock air brakes, satellite navigation systems and collision avoidance markings. This course will familiarize the officer with basic commercial vehicle accident investigation principles. In addition, the course will provide training in the federal and state regulations concerning commercial driver log books and commercial vehicle equipment. Basic mechanical systems of commercial vehicles will also be explained. In addition, the height, weight and length laws within the ORC will be discussed. Finally, training will be provided in airbags and black box technology issues to aid the officer in the investigative process.

ABOUT THE TOPICS:

- Commercial Vehicle Accident Investigation
- Understanding Commercial Brake Systems
- Anti-lock Air Brakes for Tractors and Trailers
- Understanding How Speed Calculations Can Be Made
- Definitions, Basic Terminology and Overview of the Trucking Industry
- Federal Regulations and PUCO Laws
- Commercial Drivers Licensing and Driver Qualifications
- Driver's Hours of Service and Log Books
- Manifests, Bills of Lading, Consignor and Consignee
- Commercial Vehicle Mechanical Systems
